

## DUO GRIP H-PATTERN TIRE CHAINS

### Joining Instructions

(Regular Link & V-Bar)

The Duo Grip and V-Bar Duo Grip chains are split apart into sections to facilitate efficient shipping.

These instructions explain how to quickly and easily join the sections together before installing the chains on your tractor or backhoe.

You will not require any tools, the sections are joined using Quick Links. Please see reverse side.

**Joining Instructions**

(Regular Link & V-Bar)

Each 1/2 pair of chain will have coloured quick links at attachment points. One half pair will have RED quick links (shown at left) and the other 1/2 pair will have BLACK quick links. Join the red quick links to each other, and join the black quick links to each other.

ABOVE: Ensure that Cross Chain Hooks are facing up as shown above.

AT RIGHT (1/2 Pair) :  
The Duo Grip chains should look like this once both sections are joined together, forming a 1/2 pair (as shown). Repeat with other 1/2 pair and then you will have a complete pair of chains.
